The CMF Phone 2 Pro is also more durable than its predecessor, with things like Panda Glass on the front and an IP54 ingress protection rating, alongside a manufacturer's promise that the phone should last for up to 20 minutes in up to 25cm of fresh water. The back is still made of plastic, though, with the pros and cons that entails.

### Nothing CMF Phone 2 Pro 5G specs at a glance:

- › **Body:** 164.0x78.0x7.8mm, 185g; plastic body, Panda Glass front; User-replaceable back cover, IP54 dust protected and water resistant (water splashes), Manufacturer-rated water-resistant (up to 25cm for 20 min).
- › **Display:** 6.77" AMOLED, 1B colors, 120Hz, HDR10+, 800 nits (typ), 1300 nits (HBM), 3000 nits (peak), 1080x2392px resolution, 19.93:9 aspect ratio, 388ppi; Always-on display, Ultra HDR image support.
- › **Chipset:** Mediatek Dimensity 7300 Pro (4 nm): Octa-core (4x2.5 GHz Cortex-A78 & 4x2.0 GHz Cortex-A55); Mali-G615 MC2.
- › **Memory:** 128GB 8GB RAM, 256GB 8GB RAM; microSDXC.
- › **OS/Software:** Android 15, up to 3 major Android upgrades, Nothing OS 3.2.
- › **Rear camera:** Wide (main): 50 MP, f/1.9, 24mm, 1/1.57", 1.0µm, dual pixel PDAF; Telephoto: 50 MP, f/1.9, 50mm, 1/2.88", PDAF, 2x optical zoom; Ultra wide angle: 8 MP, f/2.2, 15mm, 120-degree, 1/4.0", 1.12µm.
- › **Front camera:** 16 MP, f/2.0, 22mm (wide), 1/3.0".
- › **Video capture:** Rear camera: 4K@30fps, 1080p@30/60/120fps, gyro-EIS; Front camera: 1080p@30fps.
- › **Battery:** 5000mAh; 33W wired, 5W reverse wired.
- › **Connectivity:** 5G; Wi-Fi 6; BT 5.3; NFC.
- › **Misc:** Fingerprint reader (under display, optical).

What about the internals, then? Well, the Pro mostly lives up to the moniker with quite a few upgrades over the CMF Phone 1. The display, for one, is bigger and brighter, with 10-bit color and HDR10+ support. The camera department has seen a lot of upgrades as well and is now much more versatile with a 50MP telephoto and an 8MP ultrawide added to the mix. On some markets, the CMF Phone 2 Pro also introduces NFC for payments.

There are plenty of similarities between the CMF Phone 2 Pro and the original CMF Phone 1 on the inside too. The chipset hasn't changed much; it is now the MediaTek Dimensity 7300 Pro instead of the regular 7300. The battery is the same 5,000 mAh pack with 33W wired charging support. Crucially, likely for many prospective buyers, the CMF Phone 2 Pro retains the microSD storage expansion slot.

However with plenty of other hardware upgraded, it is understandable that the price of the CMF Phone 2 Pro has increased as well. At the time of writing, an 8GB/128GB unit will set you back around €250. Join us as we try to determine whether the Phone 2 Pro is a bargain at that price!

## Unboxing

The CMF Phone 2 Pro ships in a rather thin sleeve-style cardboard box. There really isn't much material between the contents and any potential outside threat, which we don't appreciate. Even so, we are not too worried due to the internal arrangement, which has a box on top of the phone. Plus, the phone itself is nestled in a cradle for extra protection. Everything in the packaging, including said cradle, is made of recyclable materials, which is welcome.

There is sadly no charger in the box, just a basic Type-C to Type-C cable. On the plus side, a clear plastic case is included, so you can start using your phone immediately.

x264 and x265 are not 'the same', 20 years old x264 produces large deformations on similarly coloured areas. I don't understand why anyone uses it - 10 years younger x265 is about 2x smaller, no area-effects and everything can encode i...

Overall phone performance is best, good camera, 5G is working, but the worst part, when come to scanning my fingers to login to banking apps (MCB, JS Bank) and PakID App, unable to login after 100s of attempts. I guess there is an issue with focus of...
