6. Final words, our verdict, pros and cons

Nothing CMF Android

The competition

At the time of writing, a base 128GB/8GB CMF Phone 2 Pro will set you back around **\$290/€250/GBP 220**, which is on the lower end of midrange. To be perfectly honest, the hardware package on offer by the CMF Phone 2 Pro is pretty great value for the price and hard to match, particularly the telephoto camera on the back.

If a telephoto is high up on your priorities list, the first competitor we are going to point out is the Motorola Edge 50 Neo. It has a 10MP 3x telephoto in its arsenal. It is also a very well-made device with an IP68 and MIL-STD-810H rating. It has an excellent, albeit slightly smaller 6.4-inch display, stereo speakers, a comparable MediaTek Dimensity 7300 chipset, but sadly no expandable storage.

Over on team Xiaomi, you can find a great deal on a Poco X7 Pro. Sure, it lacks a telephoto camera, but it is an excellent overall phone with a particular focus on performance through its

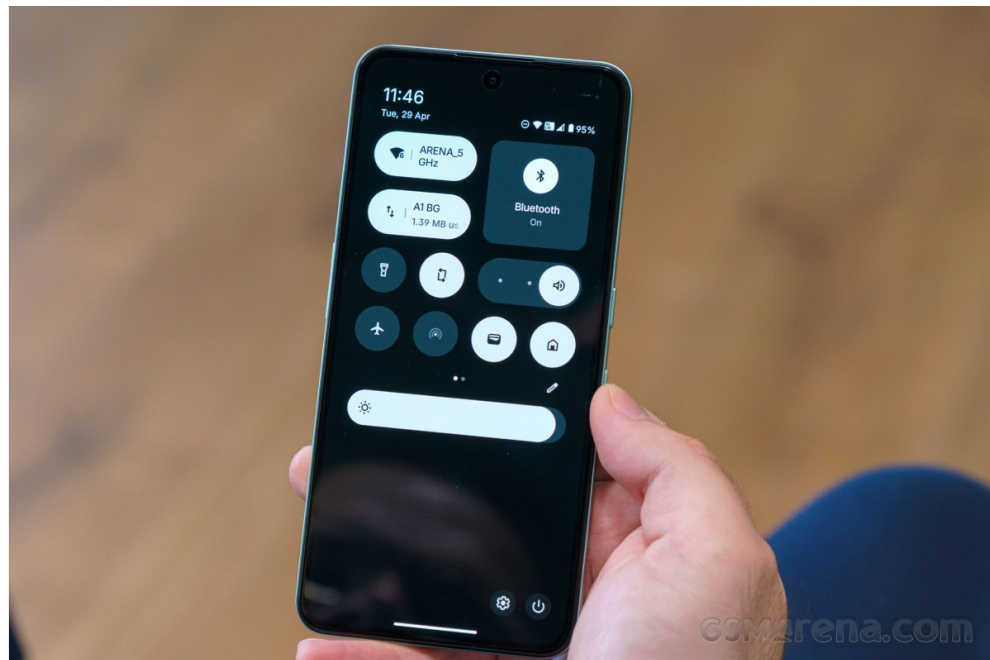

Dimensity 8400 Ultra chipset. It also offers stereo speakers and a huge battery with very fast 90W charging.

Of course, you could also save some cash and go for something like the [Redmi Note 14 Pro+ 5G](#). It is certainly not as powerful as the Poco, but the core experience it delivers is very similar.

Mitsubishi shows the Eclipse Sportback, which looks very familiar

Apple introduces new CarPlay features with iOS 27, video apps to be allowed

As for Samsung devices, unfortunately, the [Galaxy A36](#) is pricier than the CMF Phone 2 Pro. So, we must either get last year's [Galaxy A35](#) or drop to the Galaxy A26. The latter is a solid phone though, its highlights including the IP67 ingress protection rating, expandable storage (also a thing on the A35, but not the A36), and a whopping six major OS updates in its support schedule.

Motorola Edge 50 Neo • Xiaomi Poco X7 Pro • Samsung Galaxy A26

Our verdict

The CMF Phone 2 Pro offers a stand-out design, competitive hardware and feature package at its price point. The lively and bright 10-bit 120Hz display is worth praise, while the Dimensity 7300 Pro chipset is decently potent. Expandable storage, great battery life, and probably most impressive of all - a triple rear camera setup, including a dedicated telephoto camera. This combo is hard to find in the price bracket.

On the flip side, the camera performance of the CMF Phone 2 Pro is lacking in some key areas. The other shortcomings are the unimpressive single speaker, the practically non-existent ingress protection and the relatively slow charging.

Still, we genuinely enjoyed our time with the CMF Phone 2 Pro. There is no denying that it is simply different than most phones and not your run-of-the-mill affordable device. Beyond style points, however, the phone also seems to nail most of the basics for a good everyday experience. If you can live with the shortcomings we mentioned, then the CMF Phone 2 Pro deserves consideration.

Pros

- > Unique, standout design with a focus on customizability, accessories and sustainability.
- > Bright OLED with HDR and 120Hz refresh rate.
- > Great battery life.
- > Good chipset performance for the class.

Cons

- > No charger in the box.
- > Still pretty minimal IP54 ingress protection.
- > High refresh rate gaming is mostly unsupported.
- > Not particularly fast charging.
- > Pretty unimpressive single loudspeaker.
- > No camera OIS.
- > No eSIM support.
